

# Bring Your Bills — site map

Every page on the website, who it's for, and what you need to open it.

Everything lives under [bringyourbills.org.au](https://bringyourbills.org.au). The same list is on the site itself, as [All pages](#) — linked from the header of every page. The links below go to the live site. **The staff pages are not named anywhere public** — you reach them by signing in at the hub, and the passcode, not the address, is what keeps them shut.

## What you need to get in

- [Open](#) — anyone, no code
- [Service code](#) — a partner service's own code, like ANGE - 7K2M - BQF
- [Staff passcode](#) — SECL staff only, plus your name

## bringyourbills.org.au

Also reachable as [bringyourbills.com.au](https://bringyourbills.com.au), [bringyourbills.au](https://bringyourbills.au) and [byb.org.au](https://byb.org.au) — all the same site.

## For anyone coming along

The chat bubble, **BYB Helper**, is on every page in this branch.

[Home](#) /index.html [Open](#)

The next event, what to bring, what happens on the day.

[See all events](#) /calendar.html [Open](#)

Month grid, region filter, and "find events near you" by postcode.

[Map of events](#) /map.html [Open](#)

A pin per event. Events with no address are listed underneath so they're never lost.

[One event's page](#) /event.html?id=<event id> [Open](#)

Reached from the calendar or the map. Full details, who's attending, add to calendar, directions.

[Let us know you're coming](#) /attend.html [Open](#)

Optional. Name, phone and email can all be left blank.

[All pages](#) /pages.html [Open](#)

This same list, on the site. Linked from the header of every page.

[Your privacy](#) /privacy.html [Open](#)

Plain-English. Linked from the footer of every page.

[Page not found](#) /404.html [Open](#)

Shown for a mistyped address; points back to the calendar.

## For services & partner organisations

No chat bubble on these — they're working pages, and the email address is printed on them.

**Register your service for an event** /register.html [Open](#)

**No code needed — this is the way in.** SECL approves it by hand, and approving a service's first registration is what creates its service code.

**Add, change or remove an event** /request.html [Service code](#)

Also where a logo is submitted. Partner requests wait for approval; SECL's own passcode applies instantly.

**Record who you helped, on the day** /survey.html [Service code](#)

One entry per person helped, about twenty seconds. Never a name or contact detail.

**Your service's own numbers** /impact.html [Service code](#)

Each service sees only its own. Add ?service=Name to pre-fill it.

## SECL staff

**Behind one door.** The staff pages are not named on the public site — sign in at the hub and your own links appear. They are hidden from search engines, and the passcode is checked again by the server on every request.

**Staff & partner sign-in** /hub.html [Staff passcode](#)

Also takes a service code, and shows that service its own set of links instead. Signing in here means the pages it lists don't ask for the code again.

Behind it, for staff:

the review queue, registrations & stallholders & service codes, and the impact dashboard.  
For a service: the survey, its impact page, the event form and stallholder registration.

## Guides

Linked from the footer of every page.

**Guides index** /docs/guides/ [Open](#)

Four printable PDFs, plus a longer written guide per audience.

**1 — How services register** PDF [Open](#)

**2 — How we approve** PDF [For staff](#)

**3 — Using the website on the day** PDF [Open](#)

**4 — How to use the website** PDF [Open](#)

## How someone actually moves through it

| Who                              | The usual path                                                                                                                                      |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Someone needing help with a bill | Home → See all events → (postcode search) → the event's page → <i>optionally</i> Let us know you're coming. They can also just turn up.             |
| A service, first time            | Register your service → SECL approves → confirmation email <b>with their service code</b> → on the day, the survey → afterwards, their impact page. |
| A service, after that            | Register your service (2 minutes, details remembered), or Add/change an event with their code.                                                      |
| SECL staff                       | Review requests → email the new code → Registrations for planning and exports → Dashboard for reporting.                                            |

## Files, not pages

Published alongside the pages. Worth knowing they exist, because anything in them is public.

| File                           | What it is                                                                 |
|--------------------------------|----------------------------------------------------------------------------|
| <a href="#">/events.json</a>   | Every event. Downloaded by every visitor, so nothing private can go in it. |
| <a href="#">/services.json</a> | The service directory — names and logo paths.                              |
| <a href="#">/sitemap.xml</a>   | The map for search engines. Deliberately lists the public pages only.      |
| <a href="#">/robots.txt</a>    | Tells search engines to leave the staff pages alone.                       |
